OBJECTIVE

Full-Stack Web Developer with 2+ years of professional experience building scalable, API-driven web applications. Skilled in JavaScript, TypeScript, React, Node.js, and .NET. Known for writing clean, maintainable code, collaborating effectively in Agile teams, and delivering reliable, user-focused solutions.

EDUCATION

Post Graduate Diploma in Web Development – Conestoga College, Ontario, Canada (Apr 2025)
Bachelor of Technology in Computer Science Engineering – JNTUH, Hyderabad, India (Aug 2021)

SKILLS

Languages: JavaScript, TypeScript, C#, HTML5, CSS3
Frameworks & Libraries: React, Vue.js, Node.js, .NET, Bootstrap
Web & Backend: REST APIs, Full-Stack Development, API Integration
Databases: SQL, MySQL, MongoDB
Tools: Git, CI/CD, VS Code, Figma, Adobe Creative Suite
Practices: Agile/Scrum, Code Reviews, Debugging, Performance Optimization

EXPERIENCE

Software Developer – DXC Technology (Nov 2021 – Nov 2023)

- Designed and enhanced web application features with focus on performance and maintainability.
- Built and integrated RESTful APIs to support dynamic data flow across systems.
- Collaborated with frontend and backend teams to deliver production-ready features.
- Participated in Agile sprints, code reviews, and CI/CD release processes.
- Refactored legacy code to improve stability, readability, and efficiency.

Software Developer Intern (May 2021 – Oct 2021)

- Assisted in developing and enhancing application modules following coding standards.
- Integrated REST APIs for dynamic data handling and validation.
- Supported testing, debugging, and structured deployment processes.
- Collaborated with senior developers to understand backend workflows and best practices.

PROJECTS

Full-Stack Web Application

- Developed and maintained full-stack web application features aligned with architectural standards.
- Implemented API integrations, validation logic, and error handling mechanisms.
- Supported CI/CD workflows to ensure consistent and stable releases.

UI & Performance Enhancement Project

- Refactored UI components to improve responsiveness and user experience.
- Optimized rendering logic and backend interactions to reduce latency.
- Improved code readability and long-term maintainability through structured refactoring.
