Software Developer with 2 years of experience creating scalable, user-focused web applications that deliver seamless experiences for users. I thrive on turning complex requirements into clean, maintainable solutions and building features that enhance performance, usability, and accessibility. Experienced in collaborating with cross-functional teams to solve challenging problems and deliver high-quality products on time. Passionate about continuous learning and process improvement to improve product quality and team efficiency. Committed to contributing to projects that have a meaningful impact on users and the business while maintaining high standards of reliability and user satisfaction.

Experience

DXC Technology | Hyderabad India

Nov 2021-Nov 2023

- Developed and maintained user-facing web application features using React.js, translating UI/UX designs into high-quality, reusable components.
- Built scalable, responsive front-end components and optimized for performance across devices using techniques like lazy loading, code splitting, and memoization.
- Integrated front-end applications with Node.js backend services and worked with data-driven systems to ensure efficient and seamless functionality.
- Wrote and executed unit and end-to-end tests using Jest, React Testing Library, and Playwright to validate functionality, usability, and code quality.
- Collaborated with cross-functional teams, including designers, product managers, and developers, to solve complex problems and deliver high-quality solutions.
- Actively participated in Agile processes such as sprint planning, stand-ups, and code reviews, improving team productivity and code maintainability.
- Monitored application performance, identified bottlenecks, and implemented improvements to enhance reliability, accessibility, and user experience.
- Contributed to continuous product enhancements by following best practices in clean code, front-end optimization, accessibility, and performance tuning.
- Quickly adapted to new technologies and frameworks to support evolving project requirements and deliver timely solutions.

Technical Stack:

- **Languages & Frameworks:** Proficient in JavaScript, TypeScript, React.js, and Vue.js; working knowledge of Node.js.
- **Frontend Development:** Experienced in building responsive, accessible interfaces using component-based architecture and TailwindCSS, optimized across devices.
- **Backend & Integration:** Skilled in integrating with RESTful APIs to support efficient, data-driven applications.
- **Testing & Quality:** Experience with unit and end-to-end testing using Jest, React Testing Library, and Playwright.
- **Tools & Practices:** Git, Docker, CI/CD pipelines, and cloud platforms; practiced in Agile workflows, code reviews, and clean code best practices.

Projects

UI & Performance Enhancement Project

- Improved user-facing components to deliver responsive, accessible, and high-performance experiences across the application.
- Applied front-end optimization techniques such as lazy loading, code splitting, and memoization to enhance speed, reliability, and scalability.
- Took ownership of end-to-end feature development, from design and implementation to testing and deployment, ensuring maintainable, high-quality solutions.
- Collaborated with cross-functional teams in Agile workflows, contributing to design discussions, code reviews, and impactful feature delivery.
- Monitored application performance and leveraged user feedback to continuously refine features and elevate the overall user experience.

Full-Stack Web Application

- Designed and delivered full-stack features with a focus on clarity, maintainability, and reliability, following clean architecture principles.
- Took ownership of application modules end-to-end, including development, unit testing, deployment, and post-release support.
- Integrated RESTful APIs and backend services to handle dynamic data flows, validation, and error management across client and server layers.
- Maintained CI/CD pipelines and Docker-based environments, ensuring smooth, automated, and consistent application releases.
- Collaborated with cross-functional teams to translate complex requirements into practical, maintainable solutions aligned with business goals and user needs.

Software Developer Intern | Hyderabad

May 2021-Oct 2021

- Developed full-stack features following coding standards and best practices, delivering reliable, maintainable, and high-quality solutions.
- Collaborated with senior engineers to understand backend workflows and apply best practices, improving development efficiency and solution quality.
- Integrated RESTful APIs to manage dynamic data, validation, and error handling across client and server layers.
- Contributed to unit testing and QA, identifying issues and implementing timely fixes to ensure application reliability.
- Supported CI/CD pipelines and automated deployments using Docker and AWS for consistent releases.
- Utilized Git for version control, participated in code reviews, and maintained clean, maintainable code throughout the project lifecycle.

Education

Post Graduation | Web Development| Conestoga College | Ontario, Canada

Jan 2024 - May 2025

- Developed responsive, user-focused web applications with scalable and maintainable architectures.
- Applied modern development best practices, including RESTful API integration, performance optimization, and accessibility standards.
- Collaborated with cross-functional teams to translate complex requirements into secure and reliable solutions.
- Ensured code quality and maintainability through unit testing, code reviews, and adherence to clean architecture principles.

- Built a strong foundation in programming, software development methodologies, and problem-solving skills.
- Gained practical knowledge in core computer science concepts, including data structures, algorithms, databases, and software design.
- Applied learning through academic projects, teamwork, and hands-on exercises that reinforced programming and analytical skills.

Technical Initiatives

Smart India Hackathon—Participant 2018

- Developed a responsive web portal connecting educational orphanages with underprivileged children, delivering content through smart TVs to maximize accessibility.
- Designed and implemented key features with a focus on practical problem-solving, usability, and real-world social impact.
- Collaborated effectively with a multidisciplinary team in a high-pressure hackathon environment, delivering functional solutions under tight deadlines.
- Ensured an intuitive and inclusive user experience by prioritizing accessibility, clear navigation, and meaningful engagement for target users.
