

PRAVALIKA ORUGANTI

FULL-STACK DEVELOPER

Toronto, ON, Canada • pravalikaoruganti.hsm@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

SUMMARY

Full-stack developer with over two years of professional experience designing, building, and shipping React-based web applications end to end. Comfortable across the entire stack, working with React and TypeScript on the front end, Node.js and RESTful APIs on the back end, and relational and NoSQL databases for data persistence, with hands-on experience deploying to AWS and maintaining CI/CD pipelines. Skilled at integrating front-end and back-end services into reliable, scalable systems, optimizing performance, and resolving production issues through structured root-cause analysis. A collaborative Agile team member who values clean, maintainable code, strong testing practices, and delivering features that meet both user and business needs.

CORE COMPETENCIES

React.js & TypeScript | Node.js | RESTful APIs | SQL & NoSQL Databases | AWS Cloud | CI/CD Pipelines | Automated Testing | Agile / Scrum

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL

Front-End: React.js, Vue.js, HTML5, CSS3, Responsive Design, Web Accessibility (WCAG)

Back-End: Node.js, Express, RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS (S3, Lambda, API Gateway), Docker, Jenkins, CI/CD, Git, GitHub

Testing: Jest, Playwright (unit & end-to-end)

Practices: Agile/Scrum, JIRA, Confluence, Code Reviews, SDLC

EXPERIENCE

Front-End Developer, DXC Technology

Nov 2021 – Nov 2023

Hyderabad, India

- Designed, developed, and maintained full-stack features spanning a React/TypeScript front end and Node.js back-end services for an enterprise insurance platform used across multiple business teams.
- Built and integrated RESTful APIs between front-end components and back-end services, strengthening data reliability and implementing consistent validation and error handling across the full request lifecycle.
- Deployed and supported cloud-based features on AWS (S3, Lambda, API Gateway) and maintained CI/CD pipelines in Jenkins to enable consistent, automated, and reliable releases.
- Improved application performance and responsiveness by implementing lazy loading, code splitting, caching, and asset optimization across key workflows.
- Authored and maintained unit and end-to-end tests using Jest and Playwright, expanding automated coverage across both front-end and back-end layers.
- Investigated and resolved production issues through structured root-cause analysis, improving system stability and reducing recurring incidents.
- Worked with SQL and NoSQL databases (PostgreSQL, MongoDB) to model, query, and validate application data supporting back-end features and integrations.
- Participated in code reviews and followed established engineering best practices, including reusable design patterns and clean version-control workflows with Git and GitHub.
- Collaborated with product owners, designers, and back-end engineers in two-week Agile/Scrum sprints, using JIRA and Confluence to plan, track, and deliver features on schedule.

Software Developer Intern, JSpiders

Jan 2021 – Sep 2021

Hyderabad, India

- Built full-stack features in JavaScript, TypeScript, and Node.js under senior-engineer mentorship, following coding standards for maintainable software.
- Integrated RESTful APIs with input validation and error handling across front-end and back-end systems.
- Containerized and deployed builds with Docker on AWS, supporting consistent releases across environments.
- Analyzed API response times and rendering behavior to identify and fix performance bottlenecks.

PROJECTS

Elderly Care Portal | React, Node.js, REST APIs | [Live Demo](#)

- Built a full-stack web portal that helps caregivers and families coordinate elderly care, including scheduling visits, tracking medication reminders, and sharing real-time updates in one place.
- Developed Node.js REST API endpoints for secure data handling and user management, paired with an accessible, responsive React front end built from reusable components.
- Implemented role-based dashboard views so caregivers can manage daily tasks and schedules efficiently, with structured data flow between front end and back end.

Travel Experience App | React, Node.js, REST APIs | [Live Demo](#)

- Developed a travel application that lets users browse destinations, plan trips, and save personalized itineraries through a clean, mobile-first interface.
- Built and integrated REST API services to manage destination data and user itineraries, with input validation and error handling end to end.
- Implemented dynamic search and filtering and designed reusable, responsive UI components for a smooth experience across devices.

EDUCATION

Postgraduate Certificate, Web Development

Jan 2024 – May 2025

Conestoga College, Ontario, Canada (Ontario College Graduate Certificate)

Relevant Coursework: Full-Stack Web Development, JavaScript & Front-End Frameworks, Responsive Web Design, RESTful APIs, Database Design, Cloud Computing, Agile Software Development

Bachelor of Technology, Computer Science & Engineering

Jul 2017 – Aug 2021

Jawaharlal Nehru Technological University (JNTUH), Hyderabad, India

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Technologies, Operating Systems, Software Engineering
